

# What is Compliance and Why Should You Care?

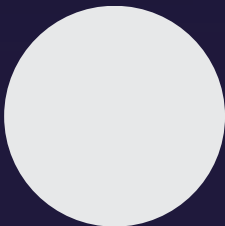

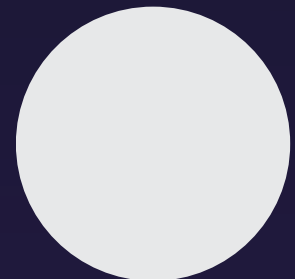

# Two Elements Of Compliance:

1. The compliance with **externally set rules and regulations.**
2. Complying with policies that have been put in place to **adhere to those external rules and regulations.**

# Common Workplace Considerations Include:

Health and Safety  
Data Protection  
Fire Safety

# Non-Compliance Implications

Failure to comply with regulations can mean **very different things** in different situations and industries.

Ultimately, the regulations that compliance has to deal with are generally about keeping **people** and **money** safe, and the punishments for not doing so can be harsh accordingly.

For example, failure to comply with life-or-death regulations, such as those covering fire safety, could mean **criminal prosecution**.

# Compliance Training

Online compliance training courses allows that you and your team can carry it out any time, anywhere.

Covering everything from **GDPR** and **Cyber Security** through to **Anti Money Laundering** and **Equality, Diversity** and **Inclusion**, our learning ensures your employees gain a deeper understanding relevant business compliance needs to minimise risks in the workplace.
