

Features of Enable LMS

Enable is an intuitive and customisable LMS that will deliver for you, your organisation and your learners. The main features are:

Online course builder

Create, duplicate and edit multi-component courses, including SCORM content, documents, videos, assessments, evaluations and certificates.

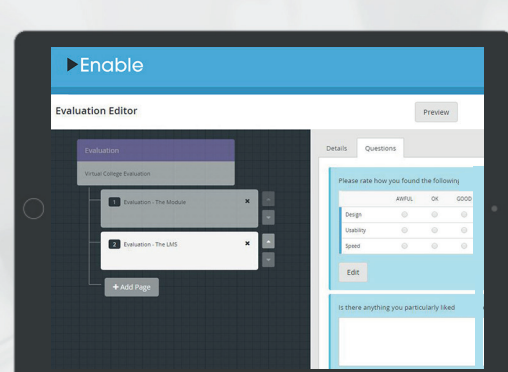

Awards and certificates

Design, create and edit certificates with the 'drag and drop' editor. Include your own branding or use ready-made templates.

Assessments

Create, duplicate and edit multi-question course assessments. Include text or image based questions and customise feedback messages.

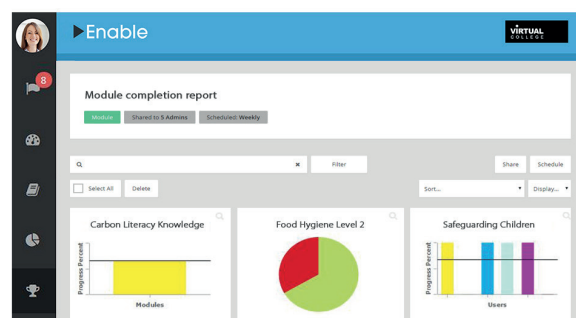

Evaluations

Create, duplicate and edit multi-page course evaluations. Include weighted multiple choice, matrix or text style questions that can be set as mandatory.

Groups

Assign learners with similar learning activities to private or public groups, so they can work together and learn collaboratively.

Full reporting

Create customisable reports that can be run, shared and exported. Add your favourite reports to your dashboard or schedule them for automatic creation.

Training events

Assign learners with similar learning activities to private or public groups, so they can work together and learn collaboratively.

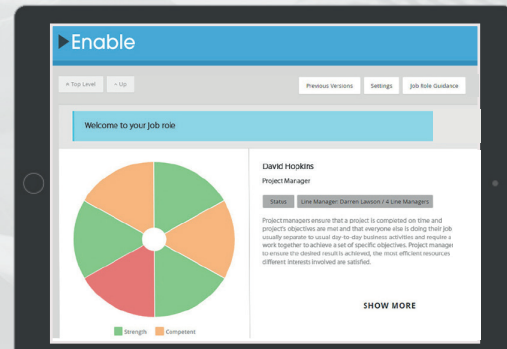

Social Learning

Support continuous improvement with forums. Promote learner-led knowledge discovery with group discussions. Communicate in real-time with messaging.

Talent management

Set and rate competency levels with job roles. Map competencies to learning activities. Auto-trigger gap-filling resources and activities for low competency levels.
