Overview

This guide describes the use of the Virtual College eLearning content creation tool **Create**.

Create allows users to create Scorm 1.2 compliant content for upload into virtual learning environments, learning management systems and managed learning environments.

Create allow users to use a range of media to create eLearning content, including text, audio, images and videos.

Create provides Content creators with:

- Ability to embed videos, from YouTube and as a direct upload
- Ability to add Flash content (swf)
- Ability to hyperlink to email and websites
- Ability to preview courses before exporting
- New HTML5 standard templates
- New HTML5 interactive templates with simple but effective quizzing options
- New Page interactions, including timings and dis/appearance of page elements
- New inclusion of written narration

Technical Details

To use Create you will need:

- Internet access on any browser above IE7, Chrome 23, Firefox 28

Content media requirements

Media to be used in Create is required to be in the following formats:

- Images: jpg, png, gif
- Movies: file size limited to 30MB
 - To embed from YouTube- embed code
 - Direct upload- mp4, mov, wmv, avi
- Embedding Flash (swf) files
- Audio: mp3

Please note: All file sizes are limited to 30MB

Terminology used

In Create we use the following terms;

Activity: Activities are a collection of pages that are exported to create an eLearning package. With Create you can create as many pages and select which to export to make your Activity.

Activity page: Activity pages are single pages of content that you create in order to build your Activity.

Template: Templates are pre-set page designs that are provided for you to create Activity pages.

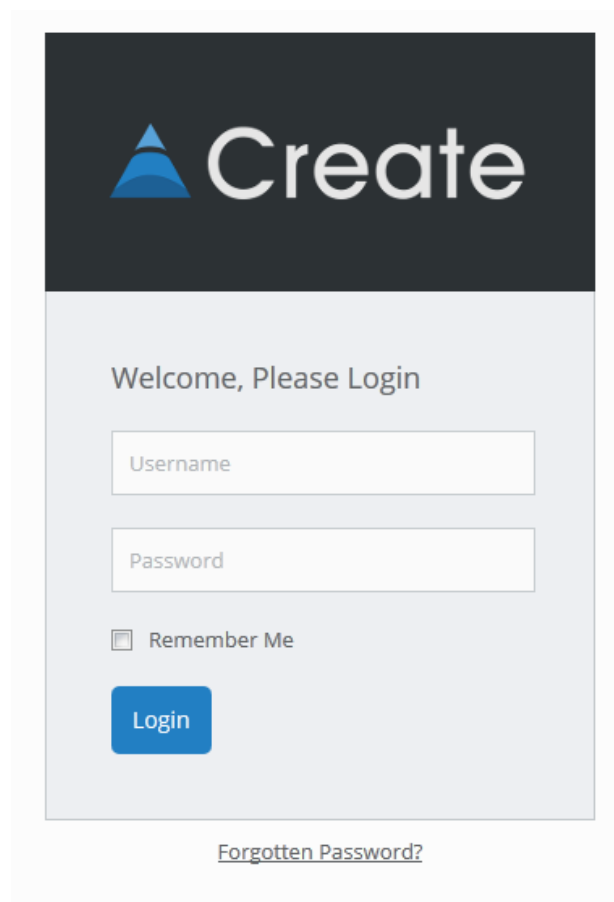

Accessing Create

The Create tool is an online content creation tool available anywhere you have an internet connection.

To log on you will need to have a username and password assigned to you. Your Account Manager or Administrator will be able to provide this for you.

To log on to the online content creation tool log on to your browser and visit:

<https://create.virtual-college.co.uk/>

The image shows a login page for a tool called 'Create'. At the top, there is a dark blue header with a logo consisting of three blue triangles of increasing size, followed by the word 'Create' in white. Below the header, the text 'Welcome, Please Login' is displayed. There are two input fields: 'Username' and 'Password'. Below these fields is a checkbox labeled 'Remember Me'. A blue 'Login' button is positioned below the checkbox. At the bottom of the form, there is a link that says 'Forgotten Password?'.

Create

Welcome, Please Login

Username

Password

☐ Remember Me

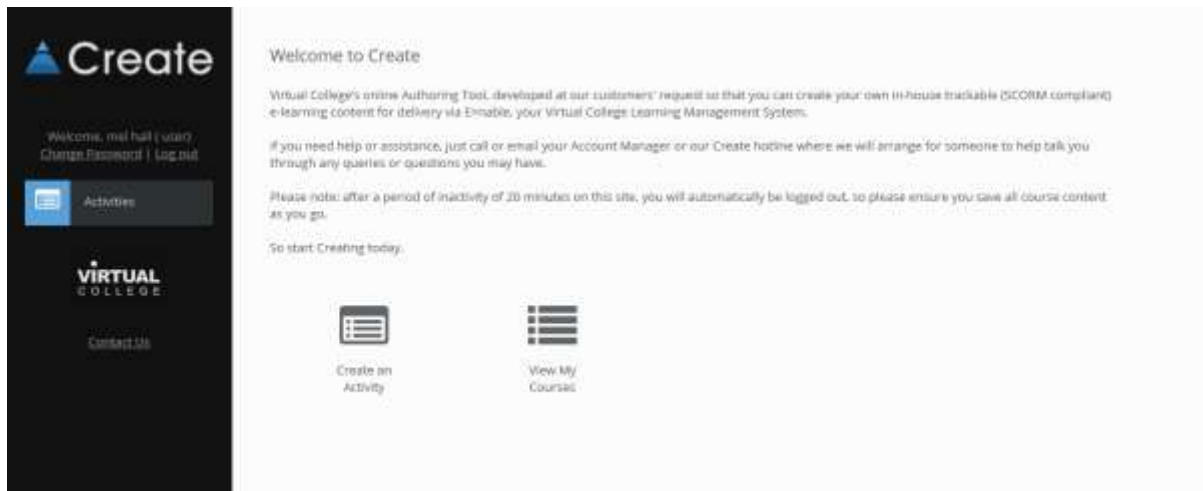

Login

[Forgotten Password?](#)

Log on to the tool using the details provided by your Virtual College Account Manager.

Ticking the **Remember Me** box will keep your details on the page to help you log in more easily.

Please Note: You should only do this on a secure machine to prevent unauthorised access to your courses.

A successful log in will result in the above Welcome screen appearing.

User Details

The system offers the ability to change your password.

To do this use the change password link on the left-hand menu.

To change your password,

- Enter your current password in the old password field
- Fill in the new password field with your new chosen password
- You will need to confirm the new password by entering the new password for a second time

To save the new password select **Change**.

To Create Content

In the Virtual College Authoring tool, Create, an eLearning content package is called an Activity. Activities are made up of a series of Activity pages.

When you log into Create you can view existing Activities and create new Activities from the home page.

To view any existing Activities use the Activities button in the left hand menu.

To create a new Activity use the icon in the welcome window

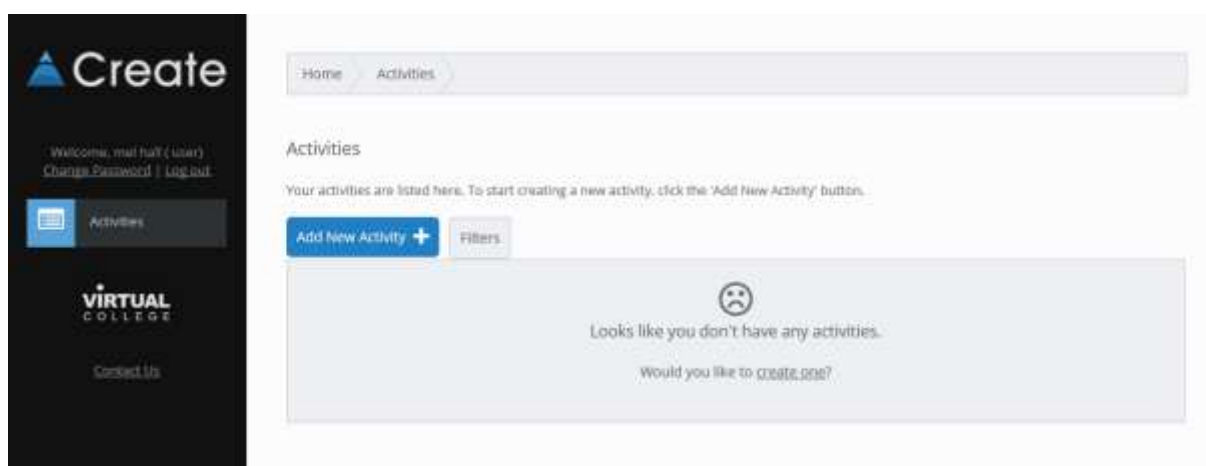

To view previously created Activities use the **View My Courses** icon

Getting Started

The first step in the process is to create a new Activity. The 'Activity' is the package of pages that will make up your learning package.

Selecting **Create an Activity** opens the Create Activity page.

Select **Add New Activity** (or **create one**) to start and the Create Activity page will appear.

Create

Welcome, mel.hall / user1

Home Activities **Create Activity**

Create Activity

Please enter the name of your course and a brief description of no more than 250 characters. Select the master page you would like to use for this course, and then pick the option of HTML5 if this is an HTML5 course.

Activity Name:

Description:

Master Page:

Is HTML5?: ☐

Save **Cancel**

Enter the name of your Activity (learning package), add a description if required.

Select a template for the Activity. There are two templates within Create, *Master* is used for Activities that are intended for only PC use, *HTML5 Master* is for use on all devices, including tablets and smartphones.

If using HTML5 as Master Page Templates please ensure the HTML5 slider is turned to green.

Is HTML5?

☒

Select **Save** to set the parameters of the Activity.

Home Activities **Create Activity**

Create Activity

Please enter the name of your course and a brief description of no more than 250 characters. Select the master page you would like to use for this course, and then pick the option of HTML5 if this is an HTML5 course.

Activity Name:

Description:

Master Page:

Is HTML5?: ☒

Save **Cancel**

Selecting **Save** brings up a view of the pages created.

As this is your first Activity and page your list will be empty and the Page List box will invite you to create one.

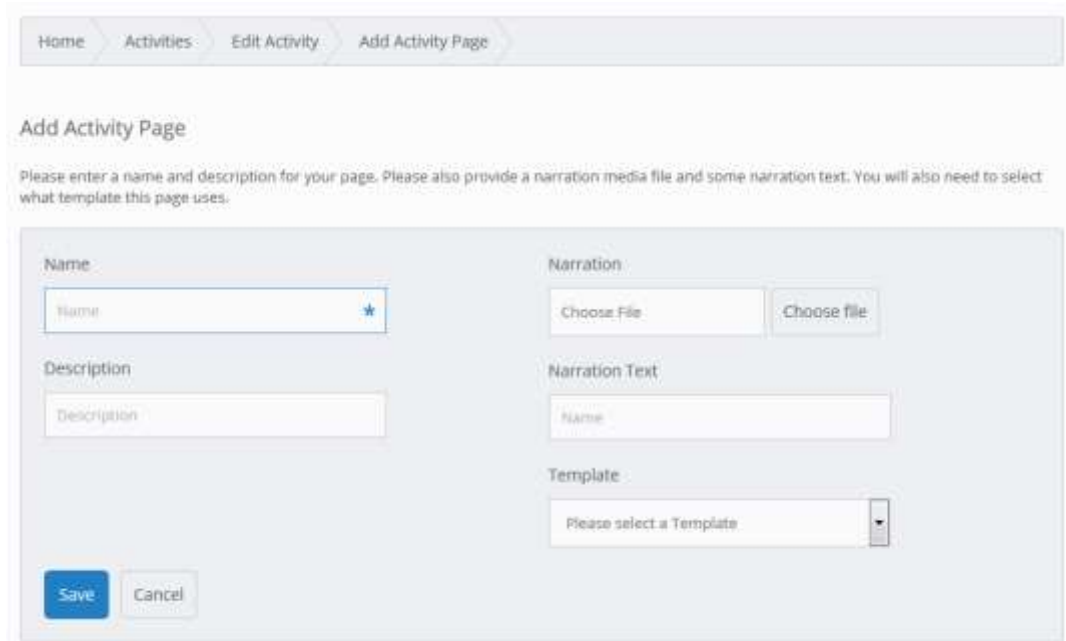

To create a new slide select **Add new page** button or the **Create one** link in the Page List box.

The screenshot displays the 'Create' application interface. On the left is a dark sidebar with the 'Create' logo, a welcome message for user 'mel hall', and links for 'Change Password' and 'Log out'. Below this is a button for 'Activities' and the 'VIRTUAL COLLEGE' logo. The main content area has a breadcrumb trail: 'Home > Activity > Edit Activity'. The 'Edit Activity' form contains a 'Name' field with 'User Manual', a 'Master Page' dropdown menu set to 'Master', and a 'Description' field with 'Optional'. There are 'Update' and 'Cancel' buttons. Below the form are 'Add New Page +' and 'Filters' buttons. At the bottom, a message states: 'Looks like you don't have any activity pages. Would you like to [Create one](#)?'.

Creating a Page

Pages are content pages that are contained within your Activity which can contain images, text, video and sound files.

Content pages are built using any of the templates available from the template drop down.

The screenshot shows a web application interface for adding a new activity page. At the top, there is a navigation bar with links: Home, Activities, Edit Activity, and Add Activity Page. Below the navigation bar, the title 'Add Activity Page' is displayed. A paragraph of instructions follows: 'Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses.' The form itself is divided into several sections. On the left, there is a 'Name' field with a star icon and a 'Description' field. On the right, there is a 'Narration' section with a 'Choose File' button and a 'Choose file' button, followed by a 'Narration Text' field. Below these is a 'Template' section with a dropdown menu showing 'Please select a Template'. At the bottom left of the form, there are 'Save' and 'Cancel' buttons.

Creating a page is two-staged process; the first step is set the parameters for your page, to set these follow the following steps:

- **Name the Page:** Add the name and any description of the page in the name and description fields. NB: The name will be the name by which the page is listed in the content and on the previous Activity page.
- **Optional - Add a description:** Add any description of the page into the description fields.
- **Optional - Add Audio narration:** Using the **browse** button and browse to a saved file, and select **save**. The maximum size for a sound file is 30MB.
- **Optional - Add narration text:** Either type in the text or copy and paste text into the field.
- **Select a layout:** Select a template from the drop down menu; this will display the format of the content page to enable a user to select the most appropriate layout for the content.

NB: Content cannot be edited until, at the least, the name and template have been selected and saved.

When basic details have been added, **Save** the page to enter the content editing stage.

When the screen refreshes the template elements on the page become available to edit.

Editing Content

To add content to an Activity page simply left click into any of the elements on the page to access the editor functions.

Edit Activity Page

Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses.

Editing Images

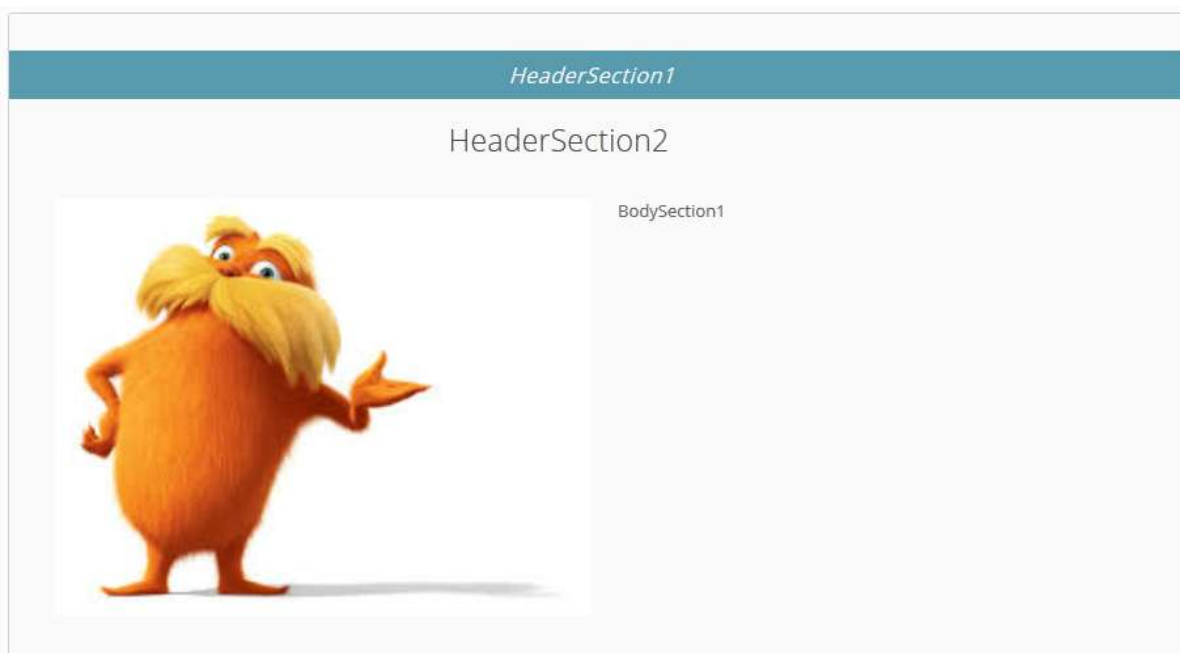

To enter an image simply left click on the image area in the template to show the Edit Content page.

Images can be .jpeg, .gif or .png formats.

A screenshot of the 'Edit Content' dialog box. It features a light blue header with the text 'Edit Content'. Below the header is a white rectangular area containing a 'New image:' label, a 'Choose File' button, a 'Choose file' button, a blue 'Update' button, and a 'Cancel' button.

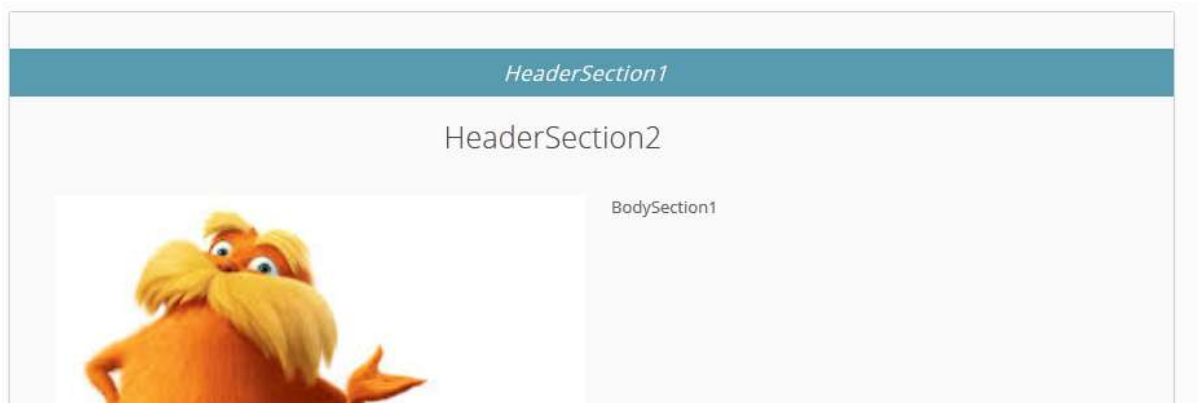

1. Browse for an image using the **Choose file** option, which opens your operating system navigation enabling you to navigate through your file structure to select your chosen image.
2. Selecting or opening the file (depending on your operating system) will add the file to the field.
3. Select **Update** to embed the image in the slide.

NB: any large image entered will be automatically scaled down to the size of the image in the slide. However smaller images will not be scaled up.

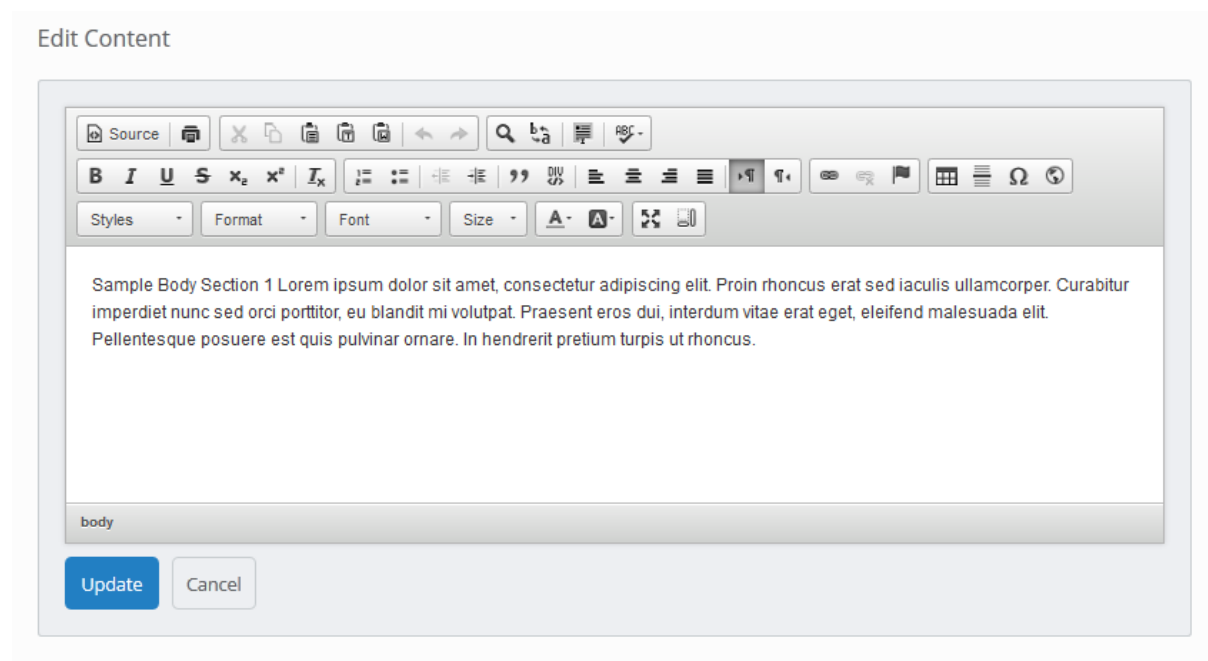

Editing Text

To edit text on a page, double click on the text areas you wish to change, this brings up the editing function.

The screen will refresh to display the Edit Content page where text can be entered and formatted.

The editing functions allow users to use a wide range of formatting options; a guide to the text functions is available in [Appendix 1](#).

Once text has been entered and edited **Update** to save the content.

Lorum Lorax

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Mauris eleifend a elit ac dignissim. Etiam sed augue eu ante tempor sollicitudin non in nibh. Sed molestie lorem ultrices mi congue ultricies. Maecenas ornare molestie varius. Phasellus fermentum, ipsum vitae ultrices cursus, tortor quam consectetur ex, et semper elit enim ut lacus.

Praesent leo risus, placerat ut vulputate quis, tincidunt eget nibh. Cras ac velit a tortor varius sagittis. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Nullam gravida mi sapien, non molestie eros lobortis id.

Nam sapien neque, lacinia convallis congue vestibulum, scelerisque semper magna. Mauris neque nisl, aliquet eu iaculis sit amet, fermentum sed ipsum. Nulla vel porttitor nunc. Pellentesque dapibus libero dolor, eu elementum justo blandit vitae. Nam et ex nibh.

Timeline

The new Timeline feature enables content creators to add HTML5 animations to your courses that enable the content elements on the page to appear at a timed interval.

Animations available are:

- **fade in down** – this fades the element into focus from a grey background
- **fade in up** – this fades the element into focus from a grey background
- **fade in** – this fades the element in to focus from a grey background
- **fade out** – this fades the element out gradually and then removes the image
- **fade out remove** – this fades the element out until it is grey and then removes it
- **scale in** – this expands the image from a point at its central point to its full size

Controls for these are:

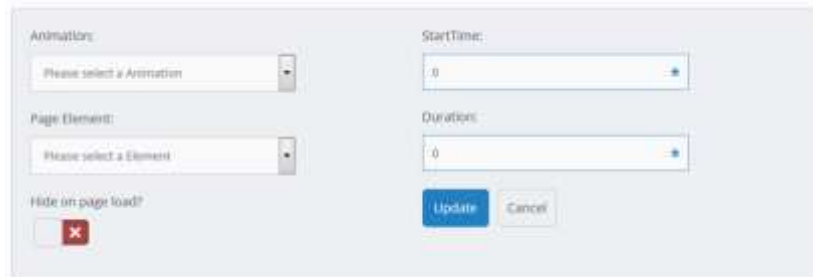

- **hide on page load** - this hides the element when the page is loaded and then performs the animation according to the time controls set
- **start time** – this delays the start of an animation for the specified number of seconds
- **duration** – this plays the animation for the specified number of seconds

Timeline elements are set using the add animation control.

Add Animation +

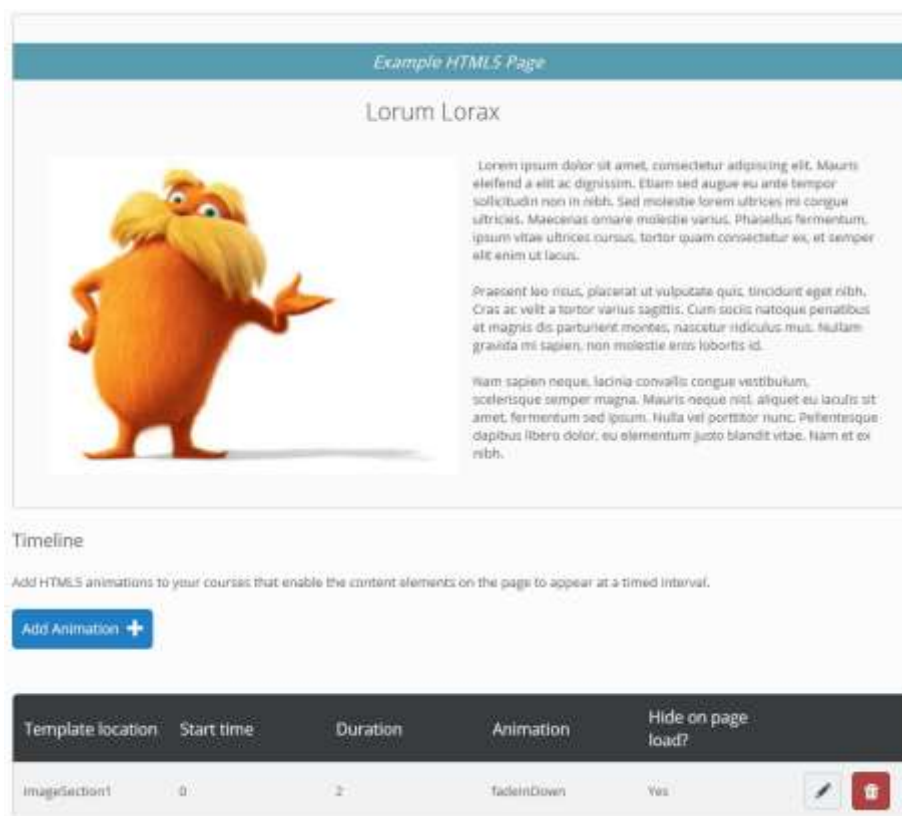

To set a Timeline control:

1. Select an animation
2. Select the page element to be animated
3. If required set a start time (in seconds) and duration for the animation, again in seconds
4. If the element is to be hidden when the page loads set the **Hide on page load** to green
5. Update to save

The dialog box for configuring a timeline control. It contains four input fields: 'Animation' (a dropdown menu with 'Please select a Animation'), 'Page Element' (a dropdown menu with 'Please select a Element'), 'StartTime' (a text input with '0'), and 'Duration' (a text input with '0'). Below these is a checkbox labeled 'Hide on page load?' which is currently unchecked. At the bottom right are 'Update' and 'Cancel' buttons.

On the page refresh the timeline control will display and be available for editing or deletion.

The screenshot shows a web page titled 'Example HTMLS Page' with a sub-header 'Lorum Lorax'. It features an image of the Lorax character and several paragraphs of placeholder text. Below the content is a 'Timeline' section with the instruction 'Add HTMLS animations to your courses that enable the content elements on the page to appear at a timed interval.' and an 'Add Animation +' button. At the bottom is a table with the following data:

Template location	Start time	Duration	Animation	Hide on page load?
ImageSection1	0	2	fadeInDown	Yes

There are also edit and delete icons at the end of the table row.

To add further animations repeat the process with another of the page elements.

Adding YouTube Video

A Helpful feature in Create is the ability to add YouTube videos.

To add a YouTube video you will need to select the *YouTubeNoTitleNoText* template or the *HTML5 Title, Subtitle, YouTube* template.

Edit Activity Page

Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses.

g+

e

re

t

vk

o

in

p

http://youtu.be/yslzPF3BfpQ

Start at:

1:25

The embed code required is the string of letters and numbers after <http://youtu.be/> in this example the embed code is yslzPF3BfpQ

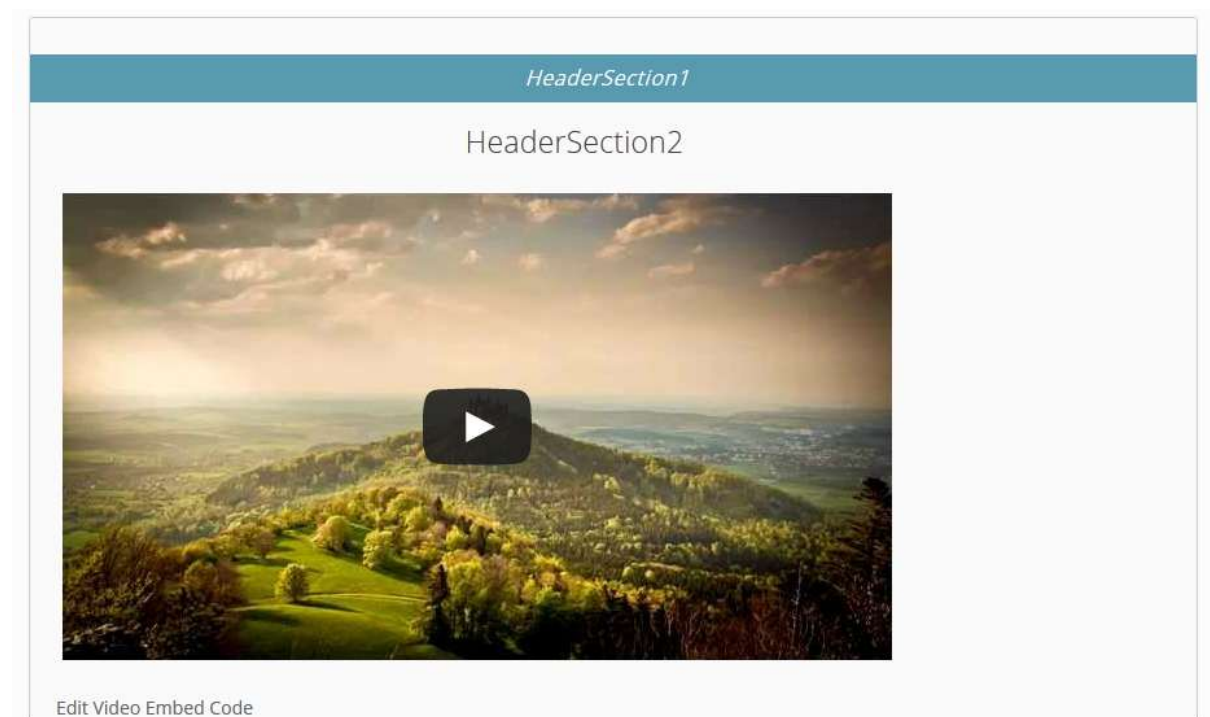

To add this use the **Edit Video Embed Code** button to access this page or select the **YouTube** text in the HTML5 template.

Edit Content

YouTube embed code:

Paste or type the embed code into the field, please note this is case specific, and then **Update** to save.

The screen will refresh and you can preview the content on the Activity page, **Save** the content when you are satisfied with your upload.

Please note: no other control is enabled with the YouTube code so adding start times or resizing will not have any effect on the video embedded.

Adding Video

To add video to your Activity you will need to use the *VideoUploadNoTitleNoText* or *HTML5 Title, Subtitle, Video* template.

Add Activity Page

Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses.

Name <input type="text" value="Name"/>	Narration <input type="button" value="Choose File"/> <input type="button" value="Choose file"/>
Description <input type="text" value="Description"/>	Narration Text <input type="text" value="Name"/>
	Template <input type="text" value="HTML5 Title, Subtitle, Video"/>

HeaderSection1

HeaderSection2

VideoUpload

Video formats that Create can upload are as follows:

- mp4
- mov
- wmv
- avi

These files need to be less than 30MB in size, while this seems like a small file 30MB is around 3 -3½ minutes of play.

As content in Create is designed to be viewed on as many platforms as possible, any video uploaded is converted into four other formats, FLV, MP4, OGV and WEBM. These formats enable the video to be seen on a wide range of mobile devices and in all the major browsers.

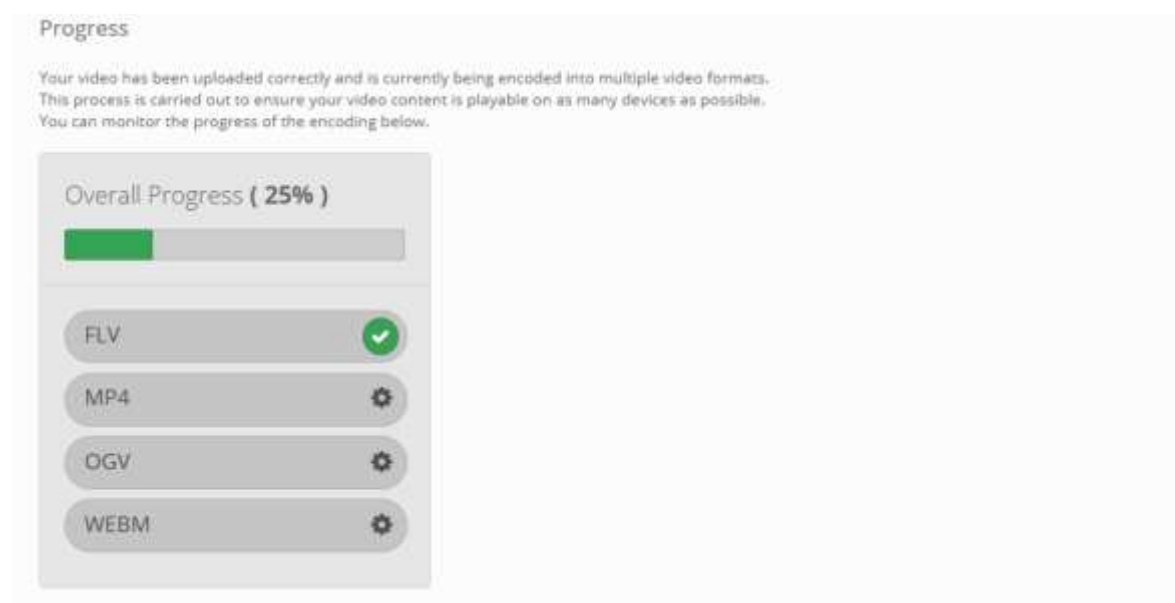

To upload video use the **Edit Video** button to access the editing screen or if using the HTML5 template click on the **Video Upload** text.

Browse for your chosen video and click **Update**.

On updating you will be taken to the Progress page. This page allows you to view the progress of the conversion of your video to the four formats.

You will need to wait for all formats to be processed before you can move forward.

When your video has been converted you will be given the option to go back to your Activity page.

Progress

Your video has been uploaded correctly and is currently being encoded into multiple video formats. This process is carried out to ensure your video content is playable on as many devices as possible. You can monitor the progress of the encoding below.

Overall Progress (100%)

FLV

MP4

OGV

WEBM

[Back to Activity Page](#)

On returning to the Activity page you will be able to preview your video.

When you are ready **Save** your Activity page.

Adding Flash Content

To add Flash content to your Activity you will need to use the *FlashNoTitleNoText* template.

As with all Activities save the page parameters to access the Edit Flash button.

Edit Activity Page

Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses.

Name:

Description:

Narration:

Narration Text:

Template:

Flash

On clicking the Edit Flash text you will be given the option to upload both a .swf file and an image file.

As Flash is not supported by a number of handheld devices Create has the option to upload an image in place of a Flash file so that your users view an alternative image to the inaccessible flash content.

Edit Content

Edit Content

It is really important that if you choose to use flash in your activity, that you include a back-up image. This is because flash isn't supported in all browsers and across all devices. This image will show in the instance that flash ISN'T supported.

Now select the flash file you want to use where flash IS supported:

Please ensure both are uploaded. **Update** the Activity and **Save** the page as usual.

Quizzing templates

Create now has quizzing templates.

The template included allow content creators to add the following

- Drag and drop
- Single correct answer multiple choice questions
- Multiple correct answer multiple choice questions

Drag and drop

Drag and drop quizzes can be used to test user's understanding by asking them to match fields together.

To demonstrate the functionality of a drag and drop course this example will show how to create a drag and drop quiz.

In the example below we have 2 drop zones, blue and yellow and a series of items which will be matched into one or the other of them.

The screenshot shows a quiz interface with a teal header bar containing the title "Match the words to their colour". In the top right corner, it says "Question: 1/1". Below the header, the instruction "Please select the items below and then select which area you think they belong in" is displayed. There are four dark blue rectangular items: "Sea", "Sand", "Sun", and "Sky". Below these items are two drop zones labeled "Blue" and "Yellow". Each drop zone is represented by a light gray dashed rectangular box. A green "Submit" button is located below the "Blue" drop zone. At the bottom of the interface, there is a dark blue footer bar with navigation controls on the left (a document icon and "1/4", and a back arrow) and communication controls on the right (a speech bubble icon and a menu icon).

To set up the page use the *HTML5, Title, Drag* template.

Edit Activity Page

Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses.

Name <input type="text" value="drag"/>	Narration <input type="button" value="Choose File"/> <input type="button" value="Choose file"/>
Description <input type="text" value="Description"/>	Narration Text <input type="text" value="Name"/>
	Template <input type="text" value="HTML5 Title, Drag"/>

HeaderSection1

Manage Drag and Drop Quiz

Click **Manage the Drag and Drop Quiz** to access the Quiz Manager.

When in the Quiz Manager the first step in the set up process is to set up the first drop zone, click **Add Drop** to access the control.

Quiz Manager

Add as many drops as you like below:

Add Drop

Drop: <input type="text" value="Blue"/>	<input type="button" value="Add"/> <input type="button" value="Cancel"/>
---	--

Type in the text label for the Drop Zone and select **Add** to add it to the quiz.

Next add in the draggable elements by selecting **Add Drag**.

Edit Drop

Added

Drop:

Update

Cancel

And once again **Update** the Drags and the Drop to save the changes.

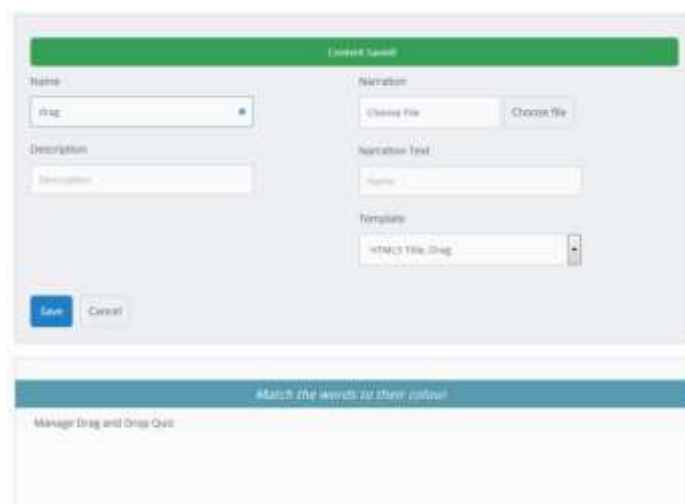

This appears in the Quiz Manager as below.

The Quiz Manager interface shows a header 'Quiz Manager' and a sub-header 'Add as many drops as you like below:'. Below this is a blue button labeled 'Add Drop'. A green bar with the text 'Edited' is visible. Below the green bar is a dark grey bar with the text 'Drop'. Underneath, there are two rows of items. The first row is labeled 'Blue' and the second row is labeled 'Yellow'. Each row has a pencil icon and a trash can icon to its right.

The drag and drop options are now set in the Quiz Manager.

Once the drags and drops are configured navigate back to the Edit Activity page to set up the title/question by clicking on the header text and then save the question.

The Edit Activity page shows a form for configuring a drag and drop question. The form has a green header bar with the text 'Content Editor'. Below the header bar, there are two columns of fields. The left column has a 'Name' field with the value 'drag', a 'Description' field with the value 'Description', and a 'Save' button. The right column has a 'Narration' field with the value 'Choose File', a 'Narration Text' field with the value 'Name', and a 'Template' dropdown menu with the value 'HTML5 Title Drag'. Below the form is a blue bar with the text 'Match the words to their colour' and a section titled 'Manage Drag and Drop Quiz'.

This completes the slide.

When previewed or exported the slide appears as below.

The quiz interface has a title bar "Match the words to their colour" and a progress indicator "Question: 1/1". The instruction "Please select the items below and then select which area you think they belong in" is at the top. Below are two columns of items: "Sea" and "Sun" on the left, and "Sand" and "Sky" on the right. Underneath are two drop zones labeled "Blue" and "Yellow", each with a dashed border. A green "Submit" button is at the bottom left. The footer contains navigation icons and a "1/4" indicator.

To answer the quiz users click on a drag item and then on the drop zone, this places the drag item into the drop zone. Selecting **Submit** marks the question and gives feedback to the user.

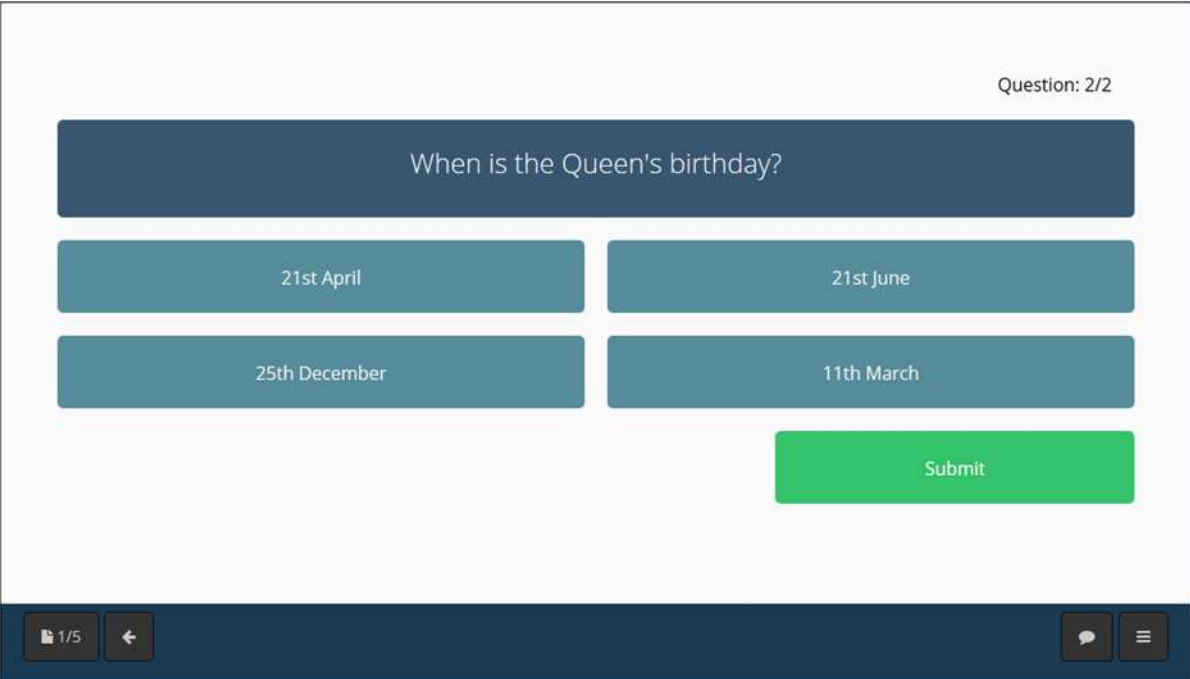

The quiz interface shows the result of the submission. The "Sea" item is now in the "Blue" drop zone with a green checkmark, while "Sun" and "Sky" are in red boxes with "X" marks, indicating incorrect matches. The "Sand" item remains in the top right. A red feedback banner at the bottom states: "You did get part of the question correct. Review your answers above - you may need to add more answers." The "Submit" button is still present. The footer navigation icons and "1/4" indicator are also visible.

A correct response is shown below.

The screenshot shows a quiz interface with a blue header bar containing the title "Match the words to their colour". In the top right corner, it says "Question: 1/1". Below the header, the instruction "Please select the items below and then select which area you think they belong in" is displayed. The interface is divided into two main sections: "Blue" and "Yellow". Under the "Blue" section, there are two green buttons labeled "Sky ✓" and "Sea ✓". Under the "Yellow" section, there are two green buttons labeled "Sun ✓" and "Sand ✓". Below these sections is a green "Submit" button. At the bottom of the interface, a large green banner displays the message "Congratulations, that is the correct answer!". The bottom navigation bar includes a "1/4" indicator, a back arrow, a speech bubble icon, and a menu icon.

Adding single correct answer multiple choice questions

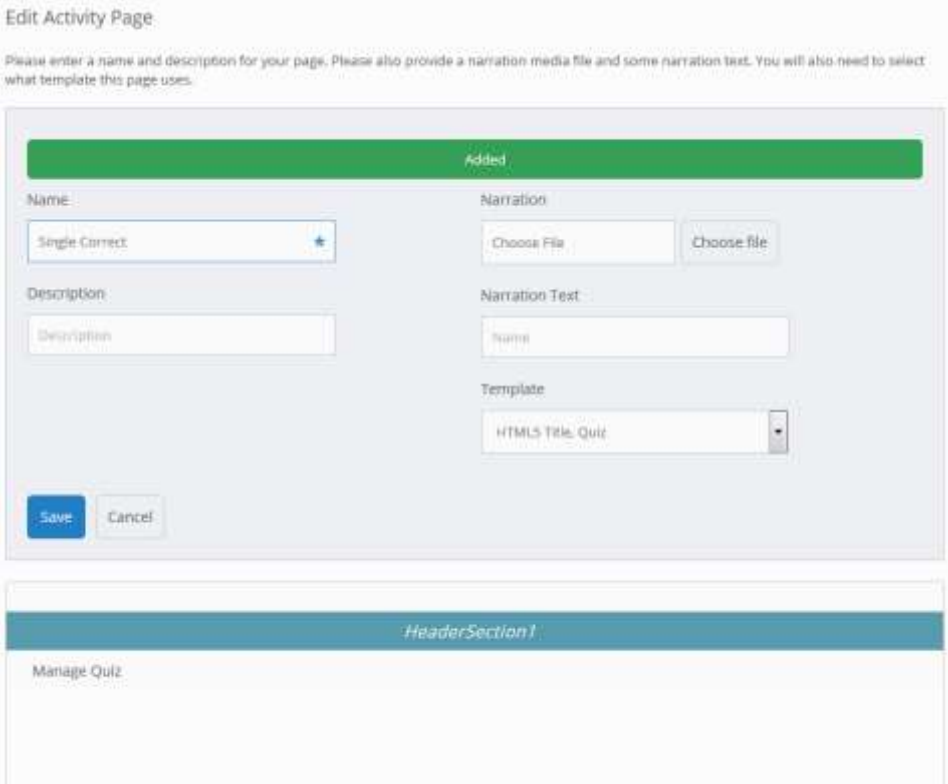

Create provides the ability for course creators to test user's understanding using single answer quizzes.

The screenshot shows a quiz interface with a dark blue header bar at the top right displaying "Question: 2/2". Below this is a large dark blue box containing the question "When is the Queen's birthday?". Underneath the question are four light blue rectangular buttons arranged in a 2x2 grid, each containing a date: "21st April", "21st June", "25th December", and "11th March". To the right of these buttons is a green rectangular button labeled "Submit". At the bottom of the interface is a dark blue footer bar. On the left side of the footer bar are two small dark blue buttons: one with a document icon and "1/5", and another with a left arrow icon. On the right side of the footer bar are two small dark blue buttons: one with a speech bubble icon and another with a hamburger menu icon.

To set up a single answer quiz open a new page and use the *HTML5 Title, Quiz* Template.

Click **Manage Quiz** to access the controls to build the quiz.

The screenshot shows the "Edit Activity Page" form. At the top, there is a green banner with the word "Added". Below this is a section titled "Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses." The form is divided into two columns. The left column has a "Name" field with a dropdown menu showing "Single Correct" and a star icon, a "Description" field with a text input, and "Save" and "Cancel" buttons at the bottom. The right column has a "Narration" section with a "Choose File" button and a "Choose file" button, a "Narration Text" field with a text input, and a "Template" dropdown menu showing "HTML5 Title Quiz". Below the form is a section titled "HeaderSection1" with a "Manage Quiz" button.

In the resulting screen select **Add Question** to add the Quiz's question.

This will open the control to add the question to be asked and the option for the response.

Add Question

Question:

Question Type: Please select a Question type

In question type select **Single- correct** and add the text of the question under **Question**.

Add Question

Question:

Question Type: Single-correct

Select **Add** to save the Question settings.

Once the Question is saved, the control for adding Answers appears. Use **Add Answer** to add the first answer option.

Edit Question

Added

Question:

Question Type: Single-correct

Adding Multiple Correct Answer Questions

Adding multiple correct answer quizzes is almost the same process as single answer quizzes except that the Multiple choice option is selected and more correct answers are set.

The example below shows the process for setting up the question.

To add a multi response quiz set up the template as per the single answer (use *HTML5 Title, Quiz*).

Add Activity Page

Please enter a name and description for your page. Please also provide a narration media file and some narration text. You will also need to select what template this page uses.

Name	Narration
<input type="text" value="Multiple Correct"/>	<input type="button" value="Choose File"/> <input type="button" value="Choose file"/>
Description	Narration Text
<input type="text" value="Description"/>	<input type="text" value="Name"/>
	Template
<input type="button" value="Save"/> <input type="button" value="Cancel"/>	<input type="text" value="HTML5 Title, Quiz"/>

HeaderSection1
Quiz

Use the Quiz manager to add the question.

Quiz Manager
<input type="button" value="Add Question"/>

Add the question text and for a Multi response select the Multi- correct option.

Edit Question

Question:	Question Type:
<input type="text" value="What are the Queen's sons called? *"/>	<input type="text" value="Multi-correct"/>
<input type="button" value="Update"/>	<input type="button" value="Cancel"/>

Add questions, with text, marked as correct or incorrect and any points to be awarded for successful selection as shown in the previous example. **Update** to save the answer.

This is an example of the setup of a correct answer.

Edit Drag

Enter an option to this, the number of points allocated (integers only) and whether this is the correct option

Drag:	Is Correct?
<input type="text" value="Charles *"/>	<input checked="" type="checkbox"/>
Points:	<input type="button" value="Update"/>
<input type="text" value="33 *"/>	<input type="button" value="Cancel"/>

This is an example of the setup of an incorrect answer.

Edit Drag

Enter an option to this, the number of points allocated (integers only) and whether this is the correct option

Drag:	Is Correct?
<input type="text" value="William *"/>	<input type="checkbox"/>
Points:	<input type="button" value="Update"/>
<input type="text" value="0 *"/>	<input type="button" value="Cancel"/>

Add as many responses as required.

Tip: Use an even number of answers as this looks best on the page design.

Edit Activity

The edit Activity page allows a user to control the pages created within an Activity. This allows the user to arrange the Activity as needed. With the option to turn off pages as a feature, a course can be built and then exported for differing audiences without deleting pages.

Edit Activity

Please enter the name of your course and a brief description of no more than 250 characters. Select the master page you would like to use for this course, and then pick the option of HTML5 if this is an HTML5 course.

Name

*

Description

Master Page

HTML5 Course?

☒

Add New Page +

Preview ▶

Activity Page Name	Package?		Order
example html5 page	<input checked="" type="checkbox"/>	 	
Youtube	<input checked="" type="checkbox"/>	 	 
Video Upload	<input checked="" type="checkbox"/>	 	 
drag	<input checked="" type="checkbox"/>	 	 

Controls for the pages within an Activity are:

- To re-edit the page: use the pencil icon to re-open the page
- To reorder pages: use the arrows to move pages up and down the list
- To add further pages: select add new page at the top of the screen
- To delete a page: select the red bin icon and confirm deletion when asked

Packaging up your Activity

Once all of your required slides are created and in the correct order, you will need to export the pages to upload to your learning management system.

Preparing for Export

Before exporting you should;

- Ensure pages required are created and all elements in the pages are edited
- Ensure pages are in the order you wish for them to be viewed in. (In descending order 1, 2, 3 etc.)
- Select which pages are not/to be exported
 - To include the slides in the package to be exported ensure the green ticks are displayed
 - To remove any from the package click to deselect. Deselected pages are noted by the red x. Deselecting pages enables different versions of packages to be exported out of the Authoring Tool without deleting any pages.

When all pages are fully populated, in the correct order and de/selected the package is ready to export.

Activity Page Name	Package?		Order
example html5 page	<input checked="" type="checkbox"/>	 	
Youtube	<input checked="" type="checkbox"/>	 	 
Video Upload	<input checked="" type="checkbox"/>	 	 
drag	<input checked="" type="checkbox"/>	 	 
Single Correct	<input checked="" type="checkbox"/>	 	 
Multiple Correct	<input checked="" type="checkbox"/>	 	

Administrator functions:

Create has a number of functions which are limited to Administrator roles.

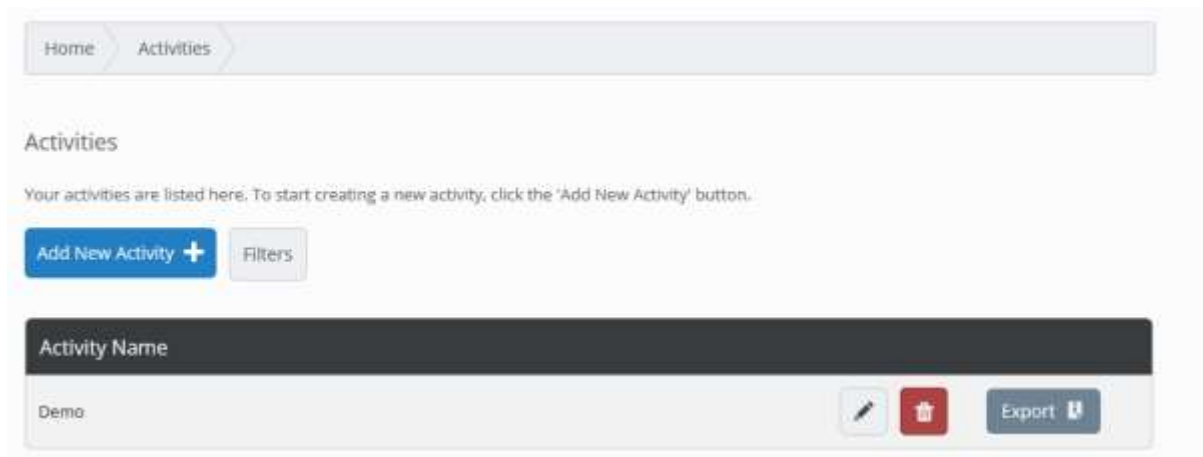

Exporting courses: This is limited so that courses can be quality checked and approved before export and upload to any LMS.

Branding: Branding only applies to Activities built with the master template. Branding allows users to label the exported courses with a corporate logo.

User control: This allows users to create and delete users and the companies in which they belong.

Exporting your Package

Exporting your Activity is done from the Home page.

To export from the main page simply use the **Export** button to start the system packaging up your Activity.

This will open the Open/Save command in whichever operating system you are using.

In IE9 this appears as:

In Firefox this will open the following:

In Chrome the download appears on the bottom bar:

In Safari this opens the following:

Always use the **Save/Save as** functions where available to save the exported file in a recognisable and accessible place on your computer/network.

The export contains a Scorm 1.2 ready zip file that is ready for upload to your LMS, no conversion is required.

The package can then be uploaded into the LMS using the standard process for your LMS.

Branding

The Authoring tool offers the opportunity to add your organisation's logo to the navigation bar to brand your learning material.

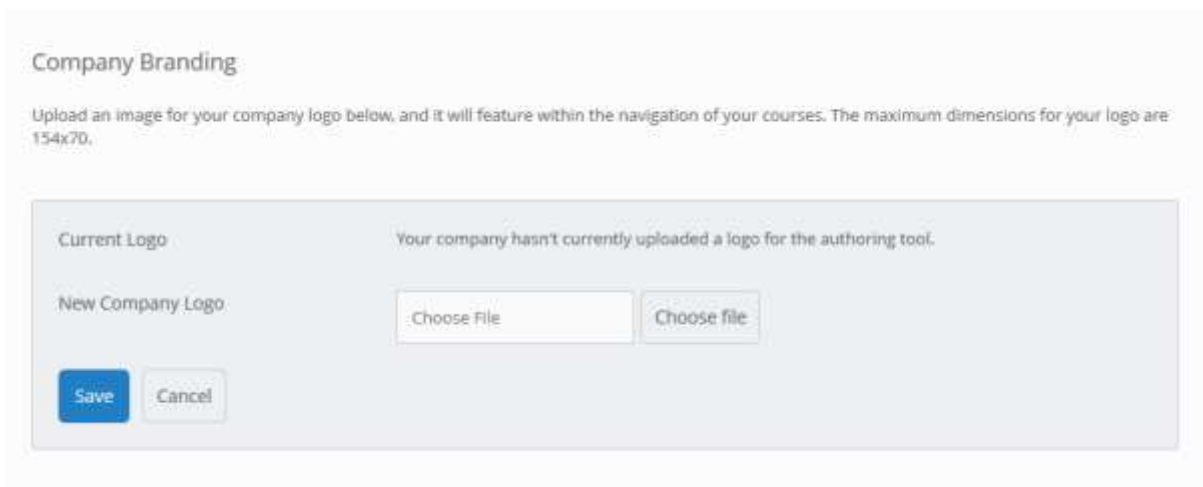

The logo will appear in the learning material's navigation bar as shown.

NB: Branding your organisation is limited to Administrator roles.

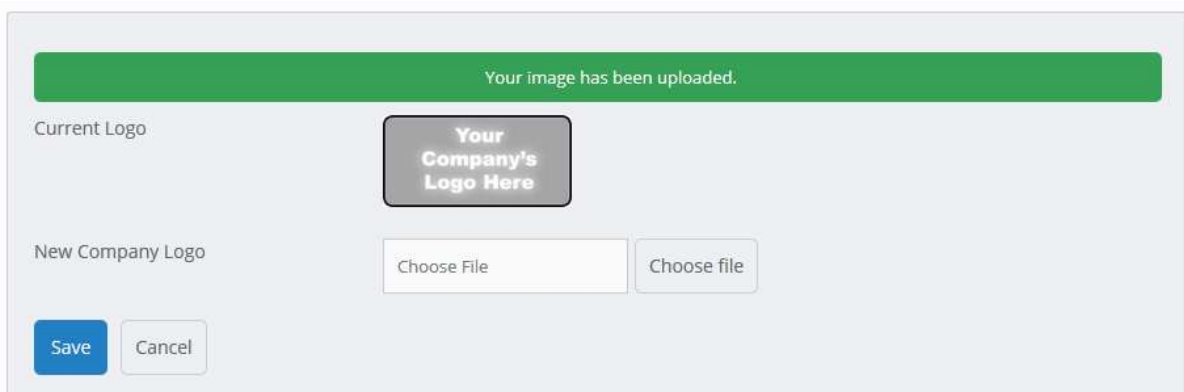

To access the branding function click on menu item on the left hand menu and select branding.

A screenshot of the 'Company Branding' form. It has a title 'Company Branding' and a description: 'Upload an image for your company logo below, and it will feature within the navigation of your courses. The maximum dimensions for your logo are: 154x70.' Below this, there are two sections. The 'Current Logo' section shows a message: 'Your company hasn't currently uploaded a logo for the authoring tool.' The 'New Company Logo' section has a 'Choose File' input field and a 'Choose file' button. At the bottom, there are 'Save' and 'Cancel' buttons.

In the branding tool simply click on **Choose file**; this will open your operating systems navigation to enable the user to browse to the image required. Use Open/Save, depending on your operating system, to select the image. This will display the file name in the field.

Selecting **Save** will save the image and apply it to all courses exported from the tool.

A screenshot of the 'Company Branding' form after a successful upload. A green banner at the top says 'Your image has been uploaded.' Below this, the 'Current Logo' section now shows a placeholder image with the text 'Your Company's Logo Here'. The 'New Company Logo' section still has the 'Choose File' input field and 'Choose file' button. At the bottom, there are 'Save' and 'Cancel' buttons.

The maximum dimensions for your logo are 154x70px; these can be in jpeg or png format.

Should you wish to change the logo simply revisit the page and repeat the procedure.

User control

The user controls allow administrators to add users onto the system.

Users

[Add New User +](#) [Filters](#)

First Name	Surname	Email	Enabled	
mel	hall (user)	mel.hall@me.com		

To add a new user

Use the **Add New User** button to access the controls, and add the new user's details.

Add New User

Email:

Password:

User Type:

Please select a User Type

Create

Cancel

First Name:

Surname:

Company:

MHC

In user choose either:

Customer Admin, if you are creating an administrator (can add users and export content)

Or

User if they are only to create content

User Type:

Please select a User Type

Please select a User Type
Customer Admin
User

In company, if a range is available, pick the company they are to be added to.

Company:

MHC

Create the user by selecting **Create**.

The user will have been added in to Create and can then access the system using their email address and the password you set for them.

Appendix 1: Using the Text Editor Functions

The text editor allows users to be able to use more formatting controls whilst creating their content. As the editor has a wide range of functions an outline of the functionality is given below. The functionality is broken down by toolbar, with button functions reading left to right.

 Source 	Source: Source allows users to view or edit the source code of the document, this function is useful for users who are familiar with HTML script
	Print: This button will open a dialogue box to allow the user to print the content of the page

Editing functions: Cut, paste, copy

      	Cut: This function allows the user to cut a selected text fragment to the clipboard
	Copy: This function allows the user to copy the selected text fragment to the clipboard
	Paste: This function is used in conjunction with cut and copy to embed content
	Paste content as plain text: This function pastes content from the clipboard without any formatting
	Paste from Microsoft Word: This function pastes content copied from MS word (or similar) from the clipboard with formatting
	Undo & redo: Undo or redo the most recent action performed

Text manipulation

	Find: This function allows a user to find a word or phrase in the document.
	Find and replace: this function enables a user to find and replace a word or phrase in the document
	Select all: This button selects all contents of the document.
	Spell check: This feature checks the spelling of the document text or turn on the <i>Spell Check As You Type</i> (SCAYT) feature.

Text formatting options

	Bold: adds Bold formatting to text
	Italic: adds <i>Italic</i> formatting to text
	Underline: adds <u>Underline</u> formatting to text
	Strike-through: adds strike through formatting to text
	Subscript: this function converts the highlighted text to _{subscript}
	Superscript: this function converts the highlighted text to ^{superscript}
	Remove formatting: this function removes the formatting from highlighted text

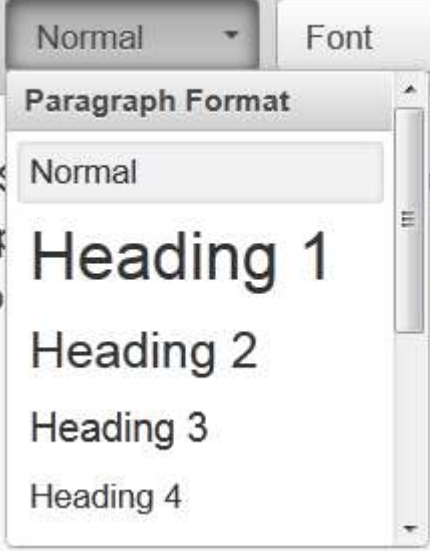

Layout options

	
	<p>Insert/ remove a numbered list: Create a numbered list.</p>
	<p>Insert/ remove a bulleted list: Create a bulleted list.</p>
	<p>Decrease/ Increase Indentation: This function defines the spacing between the beginning of a block-level element and the left margin or gutter.</p> <p>Multiple levels of indentation can be used.</p> <p>Note: due to the nature of this formatting option, indentation can only be applied to a block-level element, like a paragraph or a list item.</p>
	<p>Block quote: This can be used for highlighting quotations. It is recommended to use this type of formatting when the quoted text consists of several lines or at least 100 words.</p> <p>To add a block quotation to your text, press the button on the toolbar. Once added, the block quote formatting appears in the document on the location of the cursor.</p>
	<p>Div Container: This is an advanced feature that should only be used if you have sufficient knowledge of Web standards.</p> <p>This tool can be used to apply the same formatting rules to block-level elements throughout a page. Sometimes it is also useful to be able to apply formatting to a larger document fragment that extends beyond one block. If this is the case, a standard practice is to add a div container around a document fragment.</p> <p>To add a div element to your text, press the toolbar button. The Create Div Container dialog window that will open enables you to set configuration options that define the properties.</p>
	<p>Text alignment: This function determines the placement of text relative to the page (or the editing area).</p> <p>Text alignment can only be applied to a block-level element, like a paragraph, an image or a list item.</p> <p>The Editor supports the following alignment options:</p> <ul style="list-style-type: none"> • Align Left • Centre • Align Right • Justify
	<p>Set text direction as from left to right (default value for most Western languages) or from right to left (languages like Arabic, Persian, Hebrew).</p>

	<p>Link: This function allows a user to create a hyperlink in the text. These features can also be used for the following Hyperlink types:</p> <ul style="list-style-type: none"> • Website • Email • Anchored (flag) text
	<p>Unlink: Unlink removes any links assigned to the highlighted text</p>
	<p>Anchor: this functionality allows a user to jump to identify selections of text.</p> <p>To use this function:</p> <ul style="list-style-type: none"> • Highlight text to be referred to and 'flag' it with a name. • To link to the flagged text, highlight text and use the link function with the 'link to anchor in text'

	<p>Table: This function enables a user to create a table with a user defined number of columns and rows.</p> <p>Users can set the height and width of the table as well as control cell padding, boarder width and text alignment.</p> <p>A caption and/or summary of the content can also be added.</p> <p>Divider: this function inserts a divider line (horizontal) into the page</p> <p>Special character: This function inserts a special character or symbol from a selectable range into the page.</p> <p>Iframe: This function allows a user to embed other web content into a page using an iframe.</p>
---	--

	<p>Block styles: selecting from block styles allows a user to format a block of text.</p> <p>To use this function highlight text and select the style required from the drop down menu.</p>
---	---

	<p>Paragraph Format: This function allows a user to select from a set of pre-formatted text styles.</p> <p>TIP: Using these preformatted styles in an Activity ensure the look of the content can be kept consistent throughout the Activity</p>
	<p>Font: Using the font dropdown a user can select a font other than the default for use in content.</p>
	<p>Font size: using the drop down a user can select a different size font from the default.</p> <p>TIP: if wanting to use different size fonts consider using the Paragraph Format options.</p>
	<p>Text colour: This control allows a user to add a colour to text</p> <p>Background colour: This control allows a user to add a coloured background to text.</p>

	<p>TIP: When using these functions please consider readability, as some colours are harder to read than others</p>
	<p>Maximise: This function maximizes the editor to the full browser window.</p> <p>Show Block: This function highlights all block-level elements in the document.</p>

Images Left and Right.

The left and right images slides have the same options, just with the images either on the left or the right hand side.

<p>Title</p>  <p>Members of the Rebel Alliance SpecForce had several slang names for stormtroopers, including whitehats, plastic soldiers, snowmen, The Boys in White, bucketheads, plastic boys." Another term was "Stormies," often used by Wedge Antilles and Corran Horn.</p> <p>Although the deaths of both Emperor Palpatine and Darth Vader in 4 ABY caused the collapse and fragmentation of the original Galactic Empire, stormtroopers were retained as elite soldiers under several successor states, such as the Imperial Remnant, the Second Imperium, and the Empire of the Hand. By the year 138 ABY, stormtroopers still existed in two Imperial states: the New Galactic Empire of the Sith Lord Darth Krayn, and the "Empire" of the exiled emperor Roan Fel.</p>	<p>Image left title</p>
 <p>Stormtroopers were the elite soldiers of the Galactic Empire. Like Imperial-class Star Destroyers and TIE fighters, stormtroopers served as ever present reminders of the absolute power of Emperor Palpatine. These faceless enforcers of the New Order were considered an extension of the Imperator's will, and thus they often used efficient yet usually unreasonable tactics as a way to keep thousands of star systems throughout the galaxy in line.</p> <p>At the height of the Empire, stormtroopers had effectively become symbols of major authority. With few exceptions, they were distinguished from all other military units by their signature white armor.</p>	<p>Image left no title</p>
<p>Image left</p>  <p>The Imperial stormtroopers were the evolution of the clone troopers of the Grand Army of the Republic. By the end of the Clone Wars in 19 BBY, the Galactic Republic was reorganized into the first Galactic Empire. As a result, the Grand Army was reformed into the Stormtrooper Corps and the clones were renamed "stormtroopers."</p> <p>Under the Empire, stormtroopers operated alongside Imperial Army and Navy units, and some were stationed on Naval ships where they served as marines. Although the Corps was overseen by Stormtrooper Command, a military agency that was independent from Imperial High Command, all stormtroopers ultimately answered to Emperor Palpatine with unconditional loyalty and subservience.</p>	<p>Image left subtitle</p>

<div data-bbox="217 161 285 199" data-label="Text"> <p>Title</p> </div> <div data-bbox="217 239 280 264" data-label="Text"> <p>Subtitle</p> </div> <div data-bbox="225 313 595 508" data-label="Image"> </div> <div data-bbox="614 313 975 495" data-label="Text"> <p>The Stormtrooper Corps was an independent military branch that operated alongside the Imperial Army and Navy of the Galactic Empire. Though they functioned under their own command structure, Imperial stormtroopers ultimately answered directly to Emperor Palpatine, the architect of the New Order that incorporated most of the known galaxy under Imperial rule.</p> </div> <div data-bbox="217 533 981 582" data-label="Text"> <p>Regarded as shock troopers of the Empire, the Corps also functioned as Palpatine's chief enforcers—both within the military ranks and the galactic populace alike—due to their uncompromising loyalty to Palpatine.</p> </div>	<div data-bbox="1125 353 1327 434" data-label="Text"> <p><i>Image left, title subtitle</i></p> </div>
