

LMS USER GUIDE

REQUESTED LEARNING (ADMIN VIEW)

Requested Learning is an optional feature that is enabled when an organisation allows their learners to request their own training material rather than always allocating courses to them.

In order to use this functionality the details of the relevant manager/administrator who will be responsible for authorising requests must be set on each individual learner record in advance.

Add User

Fields with a red star (*) are mandatory.

Account Details

* User Type	Learner
* First Name	Freda
* Surname	Smith
* Email	paul.butler@virtual-college.co.uk
* Confirm Email	paul.butler@virtual-college.co.uk
* User ID	
New Password	
Expiry Date	31 December 9999

Organisational Details

* Organisation	PAB Enable Demonstration
* Department	PAB Demos - Dept 1
Job Title	
Job Title (Not In List)	
Employee Number	
Manager's Organisation	PAB Enable Demonstration
Manager	Paul Butler Organisation Admin

The correct manager details must be entered onto all individual learner records prior to using Requested Learning

WHAT THE LEARNERS SEES - When Requested Learning is enabled in an LMS, the Requested Learning tab will be accessible from the learner dashboard. When the learner selects the Requested Learning tab, they will see the options available:

The screenshot displays the E-nable LMS interface. At the top left is the E-nable logo with the tagline 'the complete LMS solution' and navigation links 'Create', 'Manage', and 'Deliver'. At the top right, it says 'Powered by VIRTUAL COLLEGE'. A blue navigation bar contains links for 'Home', 'Virtual College', 'Help & Support', and 'Logout'. Below this, a breadcrumb trail shows '>> Dashboard' and the date '26 January 2010'. The main content area has a tabbed interface with 'Active Learning', 'Completed Learning', 'Requested Learning' (which is selected), and 'Personal Development', along with a 'Help' icon. Under the 'Requested Learning' tab, the heading 'Requested Learning' is followed by an 'Export' link and the text 'You currently have no outstanding training requests.' Below this are three buttons: 'Course Request', 'New Learning Activity Request', and 'Record Historical Learning', each with a right-pointing arrow icon. On the right side of the dashboard, a user profile for 'Sue Butler' is shown, including a placeholder for a profile image, the text 'no profile image', an 'Edit Profile' link, and a list of details: 'Organisation: PAB Enable Demonstration', 'Department: PAB Demos - Dept 1', 'Manager: N/A', and 'Last Login: 26 Jan, 2010'.

Course Request – this option enables the learner to request a course from the directory of courses which have already been set up by their administrator(s).

New Learning Activity Request – this option enables the learner to submit a request to undertake or attend a course which is not already set up in their organisation.

Record Historical Learning – this option enables users to register learning that they have undertaken in the past. (This is an optional feature - so this function will only be available if the organisation has specified that it should be switched on).

WHAT HAPPENS WHEN A REQUEST HAS BEEN MADE

What happens after a learner has submitted a request will depend upon what their administrator(s) have specified regarding levels of authorisation. In some instances no manager/administrator approval may be necessary and a course will automatically appear on the learner's record as soon as they have made the request.

In other instances the learner's manager (and possibly also a senior administrator) will need to approve the course prior to it being made available to the learner. For example if there are significant costs involved, the organisation will need to authorise this prior to the learner receiving permission to undertake the course.

However, whatever the level of approval, the learner is kept advised of the current state of any request by notices on their training record and messages/emails.

MANAGING REQUESTED LEARNING

The manager/administrator view will vary slightly depending upon their user type (eg Learner Managers do not have the same level of access as Section or Organisational Administrators and, therefore, their dashboards will vary). In the following examples the screenshots relate to Section Admin Level, but the process involved in managing Requested Learning will be the same for all administrators that have access to this function.

When Requested Learning is enabled, a Course Request Summary option will appear at the bottom of the manager/administrator's dashboard.

Susan Turner	CISCO	Awaiting Manager Approval	29-Jan-2010	View >>

[Manage Requests](#)

- Check the request details
- Enter details of any message you wish to send to the learner
- Select your chosen option from the buttons at the bottom of the screen

The learner will then receive notification of your decision via message/email.

The full details of the request will then appear.

AVAILABLE OPTIONS

Approve – if all is OK – this will automatically allocate the course to the learner

Reject – if you are rejecting the request

Learner Amendment Required – if you require the learner to amend the request (for example if you need further information about the course)

The above instructions describe how a manager / administrator would deal with outstanding requests. They can also view all requests for a particular learner by clicking of the link to the learner's name, or view all requests made to date by clicking on the Manage Requests link
